About Me

Computer Engineering student at ESPRIT specializing in full-stack web development. Skilled in building scalable web applications using Spring Boot, Angular, Symfony, and MySQL. Seeking a junior internship to apply and strengthen software engineering skills in a professional environment.

Education

2024 – 2025	Computer Engineering Cycle-Private Higher School of Engineering and Technology (Esprit)
2022 – 2024	Math-Physics Preparatory Program-Preparatory Institute for Engineering Studies of Gafsa(IPEIG)
2022	Mathematics Baccalaureate-Okba Ibn Nafaa Institue In Kairouan

Technical Skills

Programming Languages C, Java, Python,php	Frameworks: Symfony, Spring Boot, Angular,.Net	Databases MySQL, Oracle
Machine Learning Machine Learning (fundamentals, academic projects)	Web Development HTML, CSS, JavaScript	Concepts REST APIs, MVC Architecture, Authentication & Authorization
Tools & Platforms Git, GitHub, Linux (Ubuntu), Azure (basic deployment)		

Language:

Arabic Fluent	English Intermediate	French Intermediate
-------------------------	--------------------------------	-------------------------------

Projects

01/2026 – 05/2026	StreetLeague – Full-Stack Sports Platform Academic Project – ESPRIT, Academic Project – ESPRIT Developed a full-stack web platform for managing amateur sports communities.Implemented team management with roles, statistics, and join requests.Built match management system with scheduling, live scores, and ELO ranking.Developed training session module with calendar integration and participation tracking.Designed an AI-based recommendation system for optimal field assignment. Technologies: Spring Boot, Angular, MySQL, Spring Security, GitHub, Azure, CI/CD pipelines (basic DevOps)
10/2025 – 12/2025	Parking Management System Developed a parking management system in C on Ubuntu for managing parking slots, reservations, billing, and user accounts. Technologies: C, Ubuntu
03/2025 – 05/2025	Event Planning Application Developed a desktop event planning application using Java and JavaFX for managing events, participants, and scheduling. Technologies: Java, JavaFX
10/2026 – 12/2026	EcoMarket Web Application (Symfony) Developed an e-commerce web application using Symfony for managing products, categories, and orders. Implemented CRUD operations, user authentication, and role-based access control using MVC architecture with MySQL integration.Technologies: Symfony, PHP, MySQL, MVC, Authentication, GitHub

Professional Experience

07/2025 – 08/2025 Remote	Designet Web Agency, Full Stack Developer Intern Developed a full-stack e-commerce web application for food products using Spring Boot and Angular. Designed and implemented RESTful APIs for product and order management. Integrated MySQL database for persistent data storage. Implemented authentication and role-based access control.Technologies: Spring Boot, Angular, MySQL, REST APIs, Spring Security, Git
