Profile

I am a passionate Computer Engineering student at ESPIRIT with a strong interest in software development and emerging technologies. I thrive on building creative solutions, continuously expanding my technical skill set, and turning innovative ideas into real-world projects.

Education

2024 – 2026	Computer Engineering student , <i>Esprit</i>
2018 – 2021	Medical Laboratory Technician , <i>El-Omrane Center</i>
2014 – 2017	Computer Network Technician , <i>Higher Institute of Applied Sciences and Technology Gafsa</i>
2012	Experimental Sciences Baccalaureate , <i>El-emptiez secondary school</i>

Skills

Programming Languages: C, Java, Python,php	Databases: MySQL, Oracle	Web Development: HTML, CSS, JavaScript
Frameworks: Symfony, Spring Boot, Angular, Hadoop	Machine and Deep Learning: Basic knowledge	Operating Systems: Unix/Ubuntu, kali, cloudera
Networking: TCP/IP protocols	Devops: Git, GitHub, Docker (basics), CI/CD concepts	Big Data: basic knowledge, Hadoop ecosystem (HDFS, MapReduce basics)

Languages

Arabic Native	English Proficient	French Proficient	German Intermediate
-------------------------	------------------------------	-----------------------------	-------------------------------

Projects

- Parking Management System**
Developed a parking management application using C on Ubuntu. Technologies: C, Ubuntu Results: Management of parking slots, fee calculation, reservations, agent management, customer service, billing, and handling of feedback and complaints.
- Event Planning Application**
Developed a desktop application for event planning using Java and JavaFX. Technologies: Java, JavaFX Results: User-friendly interface for event management, participant tracking, and report generation.

Water Level Monitoring System

Created a water level monitoring system with microcontrollers. Technologies: Microcontroller, Embedded Programming Results: Design schema and code for real-time monitoring and control

EcoMarket Web Application (Symfony)

Developed a web application using the Symfony framework to manage products, categories, users, and orders. Technologies: Symfony, PHP, Twig, MySQL, MVC Architecture . Results: Implemented CRUD operations, authentication system, responsive interface, and database integration.

StreetLeague web application

Developed a web application using Spring Boot and Angular to manage sports teams, matches, tournaments, events, and a sports marketplace. Technologies: Spring Boot, Angular, MySQL, REST API, Scrum, DevOps. Results: Implemented CRUD operations, JWT authentication with role-based access control, responsive interface, and database integration.

Professional Experience

2025

Internship

- Developed a web application using Spring Boot (backend) and Angular (frontend)
- Implemented CRUD operations, user authentication, and dynamic data management
- Collaborated on database integration with MySQL
- Gained hands-on experience with RESTful APIs, and full-stack development

2017

Final-Year Internship

- Designed and implemented a computer network infrastructure for [specify: e.g., a company, lab, or simulated environment]
- Configured TCP/IP protocols, network devices, and security settings
- Performed network monitoring, troubleshooting, and optimization
- Gained hands-on experience with network administration tools and infrastructure management
